

Google Form for Tracking Behaviors

I ended up creating and using sort of a frequency count style using scale with no text as options for the targeted behaviors and a pull down menu for each class along with a comments area. After trying different layouts, this was the best for my needs. Of course then a spreadsheet is created and you can tally for totals using excel formulas easily.

Wade C

Class

Gets drink of water

1 2 3 4 5 6 7 8 9 10

Uses Bathroom

1 2 3 4 5 6 7 8 9 10

Attempts to engage staff with off topic question

1 2 3 4 5 6 7 8 9 10

Re-focus to task needed

1 2 3 4 5 6 7 8 9 10

Work Refusal

1 2 3 4 5 6 7 8 9 10
