

# A.T. QIAT MATRICES GOOGLE FORM

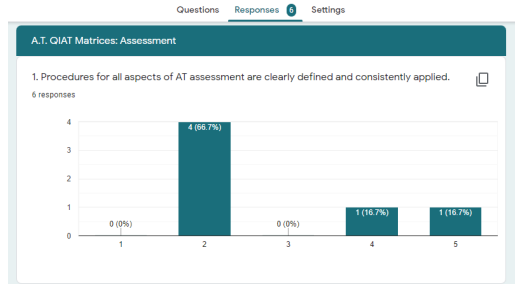

This Google form was created by consolidating the Quality Indicators Matrices found on the [QIAT website](#). The biggest benefit of using the Google form is the real time data/graphs, which are generated by Individual Response or as a Summary.

## EXAMPLES

### INDIVIDUAL RESPONSE/USER VIEW

The screenshot shows the 'A.T. QIAT Matrices: Assessment' form. It includes a title bar, a subtitle 'Quality Indicators for Assessment of Assistive Technology Needs', and a scale from 'UNACCEPTABLE' to 'PROMISING PRACTICES' with 'Variations' in the middle. Below this is a question: '1. Procedures for all aspects of AT assessment are clearly defined and consistently applied.' The response options are radio buttons labeled 1 through 5. Option 2 is selected. At the bottom, there are five columns of text describing the levels: 1. No procedures are defined; 2. Some assessment procedures are defined, but not generally used; 3. Procedures are defined and used only by specialized personnel; 4. Procedures are clearly defined and generally used in both special and general education; 5. Clearly defined procedures are used by everyone involved in the assessment process.
